

Skywarn Advisory Script

(Condition Green!)

(Remember to speak slowly and clearly)

Start (repeat every 15 minutes or as conditions dictate):

Attention all Stations. This is your call with a Kent County Skywarn Weather Advisory.

A type of watch has been issued for Kent County, until (*Expiration Time*)
Currently, there are no threatening conditions indicated by radar. Since a formal net is not needed we will not be taking any check-in's at this time. We request all stations monitor only, until the net is upgraded.

(NCS may adlib as needed)

Other Counties in the watch area include: (*List Counties*)

If a current radar summary is available:

The current radar image shows (*Radar Summary*)

Weather bulletins will be read as conditions dictate. If a repeater failure occurs, the Alternate Kent County Skywarn Net Frequency is 145.410 - with a 94.8 CTCSS tone.

End of Script

At the end of the Advisory:

This has been a Kent County Skywarn Weather Advisory. This is your call clear and listening.
